Veolia ES Tech. Solutions LLC, Port Arthur Facility, Title V Permit Renewal,Rev. O1509, dated 070912.pdf

David,

•□□□□□ We received a copy of the draft Title V Permit No. O1509 on 12/17/12. EPA did not comment on it. See the attached draft permit and Statement of Basis. I'm also attaching a copy of the renewal permit application submitted on 7/10/12.

•□□□□□ We do not have a copy of the final Title V permit. It is difficult to find exactly what you want on TCEQ's web site, you have to open nearly every single document on their Remote Document Server in your search to identify the document you want. See link:
<https://webmail.tceq.state.tx.us/gw/webpub>

•□□□□□ This link provides information on the above current (now final) permit project . The permit was issued final on 2/13/13.
http://www2.tceq.texas.gov/airperm/index.cfm?fuseaction=tv.project_report&proj_num=18243&status_txt=COI

•□□□□□ I do not have compliance information (or any other information for that matter) on this facility. Steve Thompson in air enforcement would be the best source of compliance information and can tell you which staff may be assigned to this facility. Steve's number is 214-665-2769.

Importance: High

Hi Bonnie,

I was hoping to pick your brain on the Port Arthur, TX facility owned by Veolia. Do you have a time we can chat about it? Is there someone else I should contact? Can you recommend a state contact?

Key questions are:

- 1) What is EPA's experience with this facility?

- 2) Do have a copy or link to the facility's current Title V permit? (I can't seem to connect to TCEQ's website)
- 3) Are you aware of compliance issues at this facility? Any issues related to feedstream analysis?
- 4) Do we have any finalized reports or letters that address issues at this facility?

Many thanks.

David Ogulei
